WE GUARANTEE
That all seeds sold by us shall prove to be as represented, to the extent that should they not do so, we will replace them, or send other seeds to the same value. But we cannot guarantee the crop any further than the above offer, as there are so many causes which operate unfavourably in the germination of seeds in a tropical climate, over which we have no control. Among the causes of failure may be mentioned unfavourable weather, which is one of the most important. The soil may be in proper condition when the seed is planted, but the weather which follows may be too wet, which will cause the seed to rot; or it may be too hot and dry, which destroys the germ before it shows itself. The soil may also be unfavourable for the variety of seed planted. And lastly, the seeds may be and are frequently destroyed by vermin of various kinds. Such occurrences are beyond the power of man to prevent, and for which we cannot be responsible.
